

Fast, Simple Sweeper Replaces Four Hand Brooms

Does the work of four people with push brooms. Removes dirt, dust, wood chips, metal shavings, screws and more.

Unit is lightweight and simple to use. Large wheels positioned outside frame let sweeper travel easily up stairs and over curbs. Compact design lets it go where other sweepers can't.

Model is built tough for lasting value. Features a nonmarking corrosion proof frame and hopper and other corrosion proof components.

110

Sweeper

Cleans 4 Times As Fast As A Hand Broom.

- Sweeps up to 2,000 m² per hour.
- Has 685 mm cleaning path — fits through standard doorways.
- Cleans concrete, asphalt and other hard surfaces, indoors and out.
- Works on wet and dry surfaces.
- Fume-free and quiet operation.

Main and side brushes can be adjusted without tools for different cleaning surfaces and longer bristle wear. Brushes can be easily replaced.

Rotating side brush sweeps dirt, debris and dust away from walls and corners, and pushes it into the path of the main sweeping brush. Side brush can be raised up to assist maneuverability in confined areas.

Dent-proof high density polyethylene hopper holds up to 40 liters of debris. Features a handle for easy removal, carrying and emptying.

How it works

As sweeper moves forward, side brush pulls dirt and litter from walls and curbs. Rotating main brush throws dirt into hopper. Hopper lifts out easily for dumping.

Mechanical Data

Dimensions:

Height at handle	900 mm
Length without side broom	1,090 mm
Width with side broom	760 mm

Brushes: One tubular main brush, and one disc-type side brush.

Main brush length:	480 mm
Main brush diameter:	200 mm
Side brush diameter:	305 mm

Frame & housing: Polyethylene & steel construction.

N/A

Dirt hopper: Dent-proof polyethylene. Capacity

40 L

Weight: Shipping
Operating

21.4 kg
15.9 kg

Wheels:

Two rear (solid rubber wheels)	255 mm
One front (caster)	76 mm
